

Dear Learner,

We have assigned you the mandatory Capstone Project on Olympus dashboard based on your preference shared through Elective Project Preference form.

You can find the content of your project you chose by clicking on **Courses > Capstone Project > Assessment Tab** on your Olympus dashboard. Here is everything you need to know:

Q. What is the Capstone Project ?

A: The Capstone is a comprehensive project that requires you to apply the knowledge and skills acquired throughout the program.

The Capstone Project is divided into three parts:

1. Milestone Submission
2. Final Submission
3. Live Presentation

Aspect	1. Milestone Submission	2. Final Submission
Grading Rubrics	1. Problem Definition	1. Executive Summary
	2. Data Exploration	2. Problem and Solution Summary
	3. Building Models	3. Recommendations for Implementation
	4. Comparison of various techniques and their relative performance	
	5. Proposal for the final solution design	

3. Live Presentation

This is the final stage of the Capstone Project where you need to present the final report of the project to the panelists. You will prepare a slide deck (.pptx file) for presentation and submit it as per the deadline on the dashboard. The Live presentation will be conducted as per the dates shared in the Learning Schedule (slots will be shared with all the learners through email). The objective should be to draw your audience's attention to the key points of your project - problem definition, solution design, key findings/insights, and business recommendations.

For Live Presentations you need to focus on:

- i) Quality of Slides - Structure, flow and neatness
- ii) Understanding of the solution - Ability to explain concepts
- iii) Depth of analysis - Methodology & Rigour

Q. What are the marks allotted to the Capstone Project?

A. The Capstone Project is a mandatory requirement for program completion and is valued at 100 Marks which are divided into three submissions as follows:

- i) Milestone Submission:** 20 Points
- ii) Final Submission:** 40 Points
- iii) Live Presentation:** 40 Points (Presentation deck / .pptx file + Live presentation)

Q. Is the Capstone project submission optional or mandatory?

A. The Capstone project submission is mandatory for successful program completion.

Q. What marks are required in the Capstone Project to be eligible for the certificate?

A. You need to score a minimum 60 Points out of 100 overall in Capstone Project to be eligible for the certificate.

Q. Can I skip any of the three Capstone submissions?

A. No, all the three submissions (Milestone, Final and Live presentation submission) are mandatory to be eligible for the certificate.

Q. Where can I find the Capstone Project assigned to me on the dashboard?

A. You can find the Capstone Project assigned to you on your Olympus dashboard by clicking on **Courses > Capstone Project > Assessment tab**.

Q. Can I practice Capstone Projects on the dashboard other than the project I chose for my submission?

A. Yes, you can practice other capstone projects as well. However, only one capstone project (of your chosen topic) will be considered for the submission and evaluation process.

Q. I don't see the submission link for the Capstone project. What should I do?

A. The submission link will be available on your dashboard under **Courses > Capstone Project > Assessment Tab**. If you still cannot find the submission link, then kindly reach out to your program manager for assistance.

Q. Is there a low-code option for the Capstone Project?

A. Yes, all projects in the program have 2 tracks available:

Low-Code and Full-Code. The notebooks for both tracks of Capstone Projects will be released under the Capstone Project Course on the Olympus dashboard. You can also find these notebooks for the Capstone Project you chose under **Courses > Capstone Project > Assessment Tab** on your dashboard.

Q. What is the difference between low-code and full code submission?

A. Full-code Submission:

- Intended for: Learners who want to focus on hands-on coding and aspire to take on roles heavily involving coding.
- Tasks:
 - Perform exploratory data analysis (EDA) from scratch.
 - Handle data preprocessing including duplicate checks, missing value treatment, and outlier detection.
 - Apply dimensionality reduction techniques like PCA and t-SNE.
 - Build clustering models using algorithms like K-means, GMM, K-medoids, and evaluate the clusters.

- Write and document all code and insights in a Jupyter Notebook.
- Submission File: The final solution notebook is prepared in .html format.
- Emphasis: Approximately 10-20% of grading is based on the quality of the code written.

Low-code Submission:

- Intended for: Learners aiming for managerial roles, focusing more on interpreting results and making business recommendations.
- Tasks:
 - Follow a pre-existing solution template to complete the analysis.
 - Summarize insights and create actionable business recommendations based on the analysis.
 - Prepare a comprehensive business report.
- Submission File: A business report in .pdf format with problem definition, insights, and recommendations.
- Emphasis: Approximately 10-20% of grading is based on the quality of the business report.

What Stays the Same:

- Both approaches require you to perform EDA, data preprocessing, and apply dimensionality reduction and clustering techniques.
- Insights and recommendations based on the analysis need to be provided in both submissions.

Q. How do I get support for questions regarding the Capstone project?

A. Once the submission links are available, you will find the '**AI Mentor**' option on the submission page. You may use AI Mentor to get instant assistance with all your queries or questions about your project. In case your query is not answered by the AI mentor, please raise support tickets via the '**Need Assistance**' button for assistance from our academic team. We request that you mention your concern in detail and also attach your Jupyter notebook and a screenshot of any error that you might face.

Q. Can I switch between Low Code and Full Code after Milestone submission?

A. No. It is highly advised that you complete the capstone journey with the version you choose initially.

Q. Is there a template for the project report to be submitted for Low Code that can be followed?

A. Yes, the report template with detailed instructions has been provided. You can follow the same. The sections mentioned there must be included in the report. However, please note that it is to help you get started with the project report. You can be creative with the report if you want. Therefore, we have also provided a sample report for a different problem statement. You can find the same in the section "Sample Capstone Project: Carbon Emissions Forecasting".

Q. Will the solution notebook be released for the capstone project?

A. The solution notebooks are not released to maintain the novelty of the capstone projects. You need to come up with your solution and techniques to solve the problem and you can get feedback on the same during project evaluations and final live presentations.

Q. Can the Milestone solution be improved after submission to present it as a final submission?

A. You can work on different sections of the milestone to improve upon the final submission but please note that the scores of the milestone will not be changed once released.

Q. Will there be written and individual feedback for the Milestone submission?

A. Yes, similar to project evaluation, the milestone will be evaluated and the feedback will be shared on each section of the rubric.

Q. Is this a group project or does every individual have to identify and implement a project?

A. The Capstone project is an individual project and learners need to complete the project individually but will get an opportunity to interact with peers who are working on the same project through Slack channels guided by an industry mentor.
